THAT'S ADVERTISING

**The Funding
Company**

The MAIA project aims to act as an impact multiplier of climate research projects funded under the Horizon Europe and Horizon 2020 programmes.

MAIA

=

Projects results impact multiplier

The aim is to make the current
disperse knowledge more:

Interoperable

Accessible

Usable

& Render economically sustainable outcomes

Expected results

Maia has established a set of expected results to aim towards.

Activation

Activation of a **pan-European community** of climate-driven problem solvers and enablers.

Creation

Of **technological structures** to connect knowledge and promote climate action.

(MAIA Portal, Connectivity Hub, Semantic Ontology, Marketplace and regional branches, and the Training Platform)

Coordination

Successful coordination of the **Climate Resilience Projects Cluster**.

Selected targets

These groups consist of the **supply and demand** side of climate services as well as **adaptation and mitigation** solutions.

Policy and decision makers

EU, national, regional and local level.

Innovation Ecosystem

Enterprises and practitioners, urban and spatial planners, technicians and project managers, innovators, experts in climate planning, funders and investors.

Scientific Community

Both national and international

Civil Society

Including youth, high-impact professionals, forward-thinking strategists and the general audience
